

MILLER BY HONEYWELL SINGLE LANYARD 216M/6FTGN

FEATURES

- Corrosion-resistant stainless steel and aluminum internal components extend service life and reduce replacement costs
- Composite unit on the market – easy to handle and transport to/from jobsites
- Authorized for horizontal use when used with a steel or stainless steel sling
- Smooth, quiet operation; engineered spring retraction tension designed not to pull or drag on a worker to improve productivity and reduce fatigue
- Built-in, ergonomically-designed molded handle on the 50-ft (15m) and 65-ft. (20m) cable units provide support and leverage when attaching C3811 anchorage connector. Easier to install
- Dual swivels D3814 (unit top and snap hook) included on all cable models to minimize lifeline from twisting during use
