

Fire fit 2 protective suit

Certified according to EN 469:2005 (highest protection levels Xf2 Xr2 Y2 and Z2) and EN 1149-5 (anti-static). This protective suit offers excellent protection for the many areas of use of fire services. Proven materials combined with a comfortable cut and solid basic equipment constitute the basis for the FIRE FIT 2. A new sleeve design ensures even more freedom of movement. Weighing in at just under 2.9 kg, this suit is one of the lightest in its category.
